## TOTAL RETURN • LONG/SHORT QUANTITATIVE & AI STRATEGY

### INVESTMENT APPROACH

Lakeroad's investment approach combines proprietary quantitative and machine learning (AI) strategies and signals to assess market risks every single day. Our team uses a tactical approach by adjusting leverage on core ETF long and short positions.

### INVESTMENT OBJECTIVES

Our investment strategy targets 1) a 15% net annualized return over 5-year periods 2) a positive down capture, protecting capital in difficult market environments and 3) a correlation lower than 0.30 with public markets. The combination of those three objectives should maximize alpha generation in the long run.

### MONTHLY RETURNS <sup>1</sup>

Net Annualized Return of 13.7% (net of all fees)
